PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate (2026) with Python programming and machine learning fundamentals, backed by an ML-based healthcare assistance project that applies supervised models (Logistic Regression, Decision Tree, Random Forest, SVM) to gesture classification. Experienced in REST API integration, backend application development, debugging, and structured SDLC practices through two development internships. Analytical problem-solver with a keen interest in AI/ML, Generative AI, LLMs, and Python backend development.

TECHNICAL SKILLS

Languages	: Python, C#, JavaScript
AI / ML	: Artificial Intelligence (AI), Machine Learning (ML), Supervised Learning, Logistic Regression, Decision Tree, Random Forest, Support Vector Machine (SVM)
Generative AI	: GenAI, Large Language Models (LLMs), Prompt Engineering
Python Frameworks	: Flask, FastAPI, Django (foundational knowledge)
Frontend	: HTML5, CSS3, Bootstrap, React.js, Redux, Context API
Database	: SQL Server
Tools & Practices	: Git, GitHub, Postman, VS Code, Object-Oriented Programming (OOP), CRUD, SDLC, Debugging, Unit Testing, Problem-Solving, Dependency Injection, Repository Pattern
Other Exposure	: Linux, Troubleshooting, Log Analysis, RCA, TCP/IP, DNS, HTTP/HTTPS, RPA (UiPath)

PROJECTS

ML-Based Healthcare Assistance System for Quadriplegia Patients **GitHub**

- Evaluated multiple supervised machine learning models (Logistic Regression, Decision Tree, Random Forest, SVM) for gesture classification to select the most accurate approach.
- Integrated REST APIs between a mobile application and backend services, deploying on the Render cloud platform to enable real-time caregiver notifications and remote patient monitoring.
- Research paper under review at the Turkish Journal of Electrical Engineering and Computer Sciences.

NEWZAPP — News Application **GitHub**

- Built a news application integrating REST APIs for real-time content retrieval, with local data persistence and state management for smooth navigation and offline access.

EXPERIENCE

Flutter Application Development Intern — Vish Gyana Technology Solutions, Chennai *Jul 2025 – Aug 2025*

- Integrated REST APIs for real-time data communication and handled backend data exchange within application workflows, following SDLC practices across development, testing, and deployment.
- Debugged and resolved application issues to improve stability and reliability, collaborating with the team to deliver quality software on schedule.

Mobile App Development Intern — CodSoft, Remote *Aug 2024 – Sep 2024*

- Built application prototypes applying state management concepts and performed debugging and troubleshooting to strengthen software development and analytical problem-solving skills.

EDUCATION

B.E. — Electronics and Communication Engineering, 79.5% *2022 – 2026*

Government College of Engineering, Srirangam — Anna University

CERTIFICATIONS & ACHIEVEMENT

- Entrepreneurship Essentials — NPTEL
- Network Essentials — Cisco
- Best Outgoing Student — 2022–2026 Batch, Government College of Engineering, Srirangam
